PROFILE

Senior Web Architect and independent consultant with over 20 years of experience. I work on short-term assignments involving secure business application design, internal system architecture, and custom tool development. I integrate AI APIs into application workflows and design scalable systems with a strong security-by-design approach.

KEY SKILLS

- Software architecture & scalable system design
- Secure application architecture (security-by-design)
- Business application development & workflow automation
- Web development: PHP, JavaScript, Python, Node.js
- AI API integration & data exchange (JSON)
- Database design & optimization (MySQL)
